The range includes Water, Foam, CO2 and Powder units and offers solutions for almost all situations. The internationally recognised BS Kitemark is assurance of dependable design and manufacture.

PLAIN WATER FIRE EXTINGUISHER

A water-based fire extinguisher is a popular choice for Class A fires (combustible materials). Water fire extinguishers work by cooling the fuel and ensuring it burns at a much slower pace until the fire is extinguished. With a low cost price, ease of maintenance and the fact they're an environmentally friendly option, it's easy to see why water fire extinguishers are a preferred choice for many businesses.
