CS23A Compact Double Trolley

The new Compact Trolley - why pay more?

Like its big brother - the CS23 Double Trolley - this Compact Trolley is built to last. A tough, powder coated steel frame and nylon wheels guarantee longevity of service even in harsh conditions.

It holds 2 extinguishers, and can be adapted to take CO2 extinguishers. The small backboard is pre-drilled for fitting a Rotary Alarm Bell, and can also be used to fit battery operated fire alarms and other ancillary equipment.

And the compact design saves space everywhere - in your van, in the site store, you can fit more on a pallet thereby reducing carriage cost per item. The extinguishers sit low, reducing the centre of gravity and making it easy to handle.

Supplied empty without the extinguishers and ancillaries shown.

- Space for up to 2 extinguishers
- Nylon wheels
- Robust powder coated steel frame
- Compact, space-saving design
- Backboard allows fitting of Rotary Alarm Bell, Howler Site Alarms, and other ancillary equipment
